

OVERVIEW OF THE PRODUCTIVITY INSTITUTE

Professor Bart van Ark, Managing Director & Principal Investigator
Nicola Pike, Engagement & Operations Director

WHAT DOES THE PRODUCTIVITY INSTITUTE WANT TO ACHIEVE?

1

Set an agenda

and develop national capacity that will promote research and actions that contribute to the improvement of productivity.

2

Frame the productivity

narrative such that it enters the classroom, boardroom, councils of government, and other civil societal groups and influences ideas at each of these levels

3

Work with firms

to identify obstacles to productivity at the individual, firm, and institutional level, and to formulate and evaluate private and public policy actions.

4

Work with policy makers

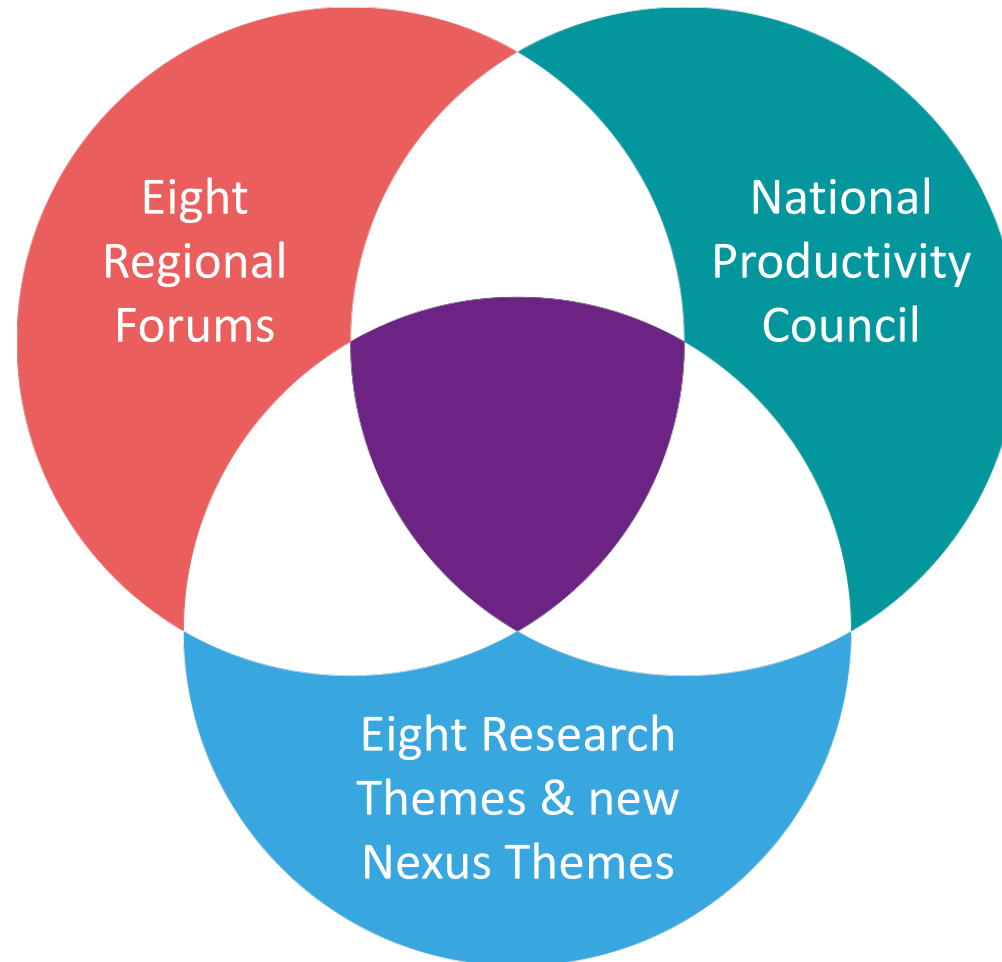

as part of an agenda to better understand the impact of local and national policies on providing an environment supportive of productivity growth.

HOW ARE WE GOING TO ACHIEVE THIS?

*“Strengthen resilience
of our economy”*

*“Achieve net-zero
carbon growth”*

*“Empower regions
to create
productivity jobs”*

*“Improve business
competitiveness”*

*“Improve living
standards”*

*“Improve access to
education, health, and
a better environment ”*

PART OF A UK WIDE COMMUNITY

EIGHT RESEARCH THEMES & NEW “NEXUS” THEMES MAY EMERGE

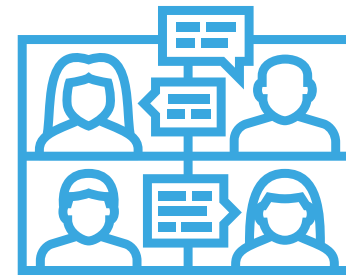

Invest in people, ideas and your organisation

Human
capital

Knowledge
capital

Organisational
capital

Leverage power of place

Geography and
place

Macroeconomic
trends and policy

Institutions and
governance

Measurement
and methods

Social, environmental and
technological transitions

Collaborate

Measure success

Focus on the big picture
